

LabKeeper

Simplify Lab Monitoring and Quality Assurance

LabKeeper by Astec is a wireless lab monitoring system specifically designed to simplify the important quality assurance work in IVF clinics.

LabKeeper continuously monitors and logs:

- Temperature
- Humidity
- CO₂
- O₂

Learn how LabKeeper by Astec can help you effortlessly monitor and keep your critical lab equipment within optimal operating conditions!

Incubate the Future with You

Total Traceability

LabKeeper's automatic logging and reports let you know the exact environmental conditions of your equipment at any point in time.

Safety

Anytime pre-set thresholds are exceeded, LabKeeper generates real-time alerts via SMS or Email so you can take immediate action to fix the problem.

Accessibility

LabKeeper's fully web-based interface allows you to monitor your IVF lab anytime, from anywhere in the world.

Equipment Types

LabKeeper can monitor:

- Full size incubators (temperature, humidity, CO₂, O₂)
- Benchtop incubators (temperature, CO₂, O₂)
- Cryotanks (temperature)
